

Grown Climate Smart Cover Crop Enrollment

Along with a completed enrollment form including all acres you wish to incentivize, payment for the Cover Crop practice requires the following materials listed on this sheet.

1. **NRCS-approved species, rates, and dates** – To be eligible for our program, producers must meet local NRCS standards for cover crop species and their associated planting rates & dates. We approve the use of the Midwest Cover Crop Tool: <https://covercroptool.midwestcovercrops.org/covercroptool/> and the Northeast Cover Crop Tool: <https://covercrop-selector.org/> to help make decisions related to the dates, rates, and seed mixes pertaining to your farm location.
2. **CC Seeding Form** – Please provide planting information for cover crops planted on your enrolled tracts. Additional copies are available at: <https://www.grownclimatesmart.com/forms-and-standards>
3. **Cover Crop Seed Receipt** – Please provide records of cover crop seed purchase. If using bin-run seed, indicate so on the CC Seeding Form. A blend ticket or some other record of seed would be beneficial.

4. **Cover Crop photos for each Tract ID** – For each individual Tract ID being enrolled for cover crop incentives, please provide a photograph of an included field after planting. Emergence is not required. Some Farm IDs have multiple Tract IDs. Photos can be uploaded to our Dropbox at www.grownclimatesmart.com/proofs, texted to David Swanson at (608)352-1726, emailed to David.swanson@grownclimatesmart.com, mailed to PO Box 552, Clinton, WI 53525, or brought to your nearest DeLong location.

Cover Crop proofs of practice have a submission deadline of **October 4, 2024**, the first Friday in October.

Exceptions will be made for enrollments with a planned seeding date after fall harvest.
