

# Grown Climate Smart Windbreak Enrollment

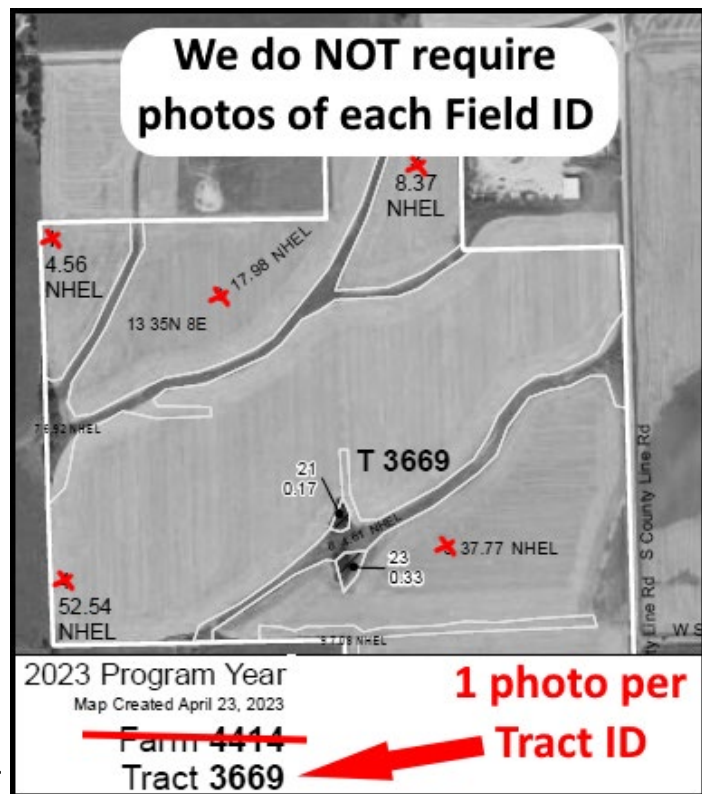

Along with a completed enrollment form including all acres you wish to incentivize, payment for the Windbreak Establishment and Renovation practice requires the following materials listed on this sheet.

1. **NRCS-approved Windbreak Alterations**– To be eligible for our program, producers must meet NRCS standards for planting or renovating a windbreak. The NRCS defines the practice lifetime of a windbreak renovation or establishment as 15-years, meaning you cannot be eligible for additional incentives if you have received payments in that timeframe.
2. **WB CPA-52 Questionnaire** – Please complete the included questionnaire to assist the Grown Climate Smart team with completing the Environmental Evaluation required by the USDA. A producer is not eligible to receive incentives until the USDA approves a submitted Environmental Evaluation

3. **Windbreak photos for each enrolled**

**Tract ID** - For each individual Tract ID being enrolled to receive incentives for Windbreak Protection, please provide a photograph of the planted or renovated windbreak before and after an alteration is made. Some Farm IDs have multiple Tract IDs. Photos can be uploaded to our Dropbox at [www.grownclimatesmart.com/proofs](http://www.grownclimatesmart.com/proofs), texted to David Swanson at (608)352-1726, emailed to [David.swanson@grownclimatesmart.com](mailto:David.swanson@grownclimatesmart.com), mailed to PO Box 552, Clinton, WI 53525, or brought to your nearest DeLong location.

Windbreak proofs of practice have a submission deadline of **October 4, 2024**, the first Friday in October.
